

Michaud Statement on the Release of Stimulus Funding for Maine Drinking Water State Revolving Fund

Friday, April 10 2009

WASHINGTON, DC – Today, Congressman Mike Michaud praised the announcement by the U.S. Environmental Protection Agency that \$19.5 million in funding had been release from the American Recovery and Reinvestment Act for drinking water construction projects in Maine. “This funding is essential because Maine’s water infrastructure is aging,” said Michaud. “Many communities must begin to increase investment in the repair and replacement of drinking water infrastructure in order to protect public safety and to maintain environmental standards. The funding announced today represents an investment in high quality drinking water systems that are essential to public health and quality of life in Maine.”

WASHINGTON, DC – Today, Congressman Mike Michaud praised the announcement by the U.S. Environmental Protection Agency that \$19.5 million in funding had been release from the American Recovery and Reinvestment Act for drinking water construction projects in Maine.

“This funding is essential because Maine’s water infrastructure is aging,” said Michaud. “Many communities must begin to increase investment in the repair and replacement of drinking water infrastructure in order to protect public safety and to maintain environmental standards. The funding announced today represents an investment in high quality drinking water systems that are essential to public health and quality of life in Maine.”

The Drinking Water State Revolving Fund provides a source of low-interest loans for water utilities to address an immediate need of upgrading drinking water infrastructure. The stimulus funding will greatly benefit many Maine communities providing additional resources for water infrastructure improvements and creating many new jobs.
